DETAILED ACTION

Allowable Subject Matter

1. Claims 1 – 10 are allowable over the prior art.

The following is an examiner's statement of reasons for allowance:

The prior art of the record fails to disclose the limitations “a NUT table setting register for storing non-rescue information which indicates whether a channel that is the object of rescue by loop-back is a non-rescue channel; and a squelch insertion unit which, on the basis of main-signal cross-connect information, interchanges a result of discrimination of each channel of the second group and inserts the interchanged result of discrimination in the main signal of the corresponding channel after cross connect”, and “timing adjustment unit for adjusting multiframe timing; a VT pointer replacement unit for replacing VT pointers using as a reference the multiframe timing that has been adjusted; means for passing VT-channel signals between said VT switches after replacement of the VT pointers; and a VT line switching unit for cross connecting the VT channel signals” to effect the evaluating in combination of other limitations recited in claims 1 and 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
